DETAILED ACTION

Claim 3 has been amended to recite a cytokine that is AAT. However, AAT is a serpin, not a cytokine. Claim 3 has been treated as being directed to AAV encoding a serpin. It is suggested that Applicant amend the claim accordingly to obviate an objection to the claim.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 3 and, in part, claims 1, 10-14, 16, 17, 19, 20, 24, and 32, drawn to an AAV comprising sequence expressing a serpin.

Group II, claim(s) 1, 10-14, 16, 17, 19, 20, 24, and 32, all in part, drawn to an AAV comprising sequence expressing a cytokine.

Group III, claim(s) 33-42 (in part), drawn to a method for treating a disease with an AAV virion expressing a serpin.

Group IV, claim(s) 33-42 (in part), drawn to Group III, claim(s) 33-42, drawn to a method for treating a disease with an AAV virion expressing a cytokine.

Group V, claim(s) 41 and 42 (in part), drawn to a method for treating a disease with a mammalian cell transfected with an AAV expressing a serpin.

Group VI, claim(s) 41 and 42 (in part), drawn to a method for treating a disease with a mammalian cell transfected with an AAV expressing a cytokine.

Art Unit: 1633

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I, III, and V and Groups II, IV, and VI share the technical feature that both are directed to an AAV vector. The technical feature shared between group I and groups III and V; between groups III and IV; between group II and groups IV and VI; and between groups IV and VI, is the vector of group I or II. However, these are not special technical features because WO 99/55564, for example, discloses AAV vectors expressing a serpin (AAT) or cytokine. Consequently, there is no unity of invention between groups I, III, and V and groups II, IV, and VI, respectively; between group I and groups III and V; between group II and groups IV and VI; between groups III and V; or between groups IV and VI.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

Art Unit: 1633

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
